C.P. Announces New Schedule On Valley Run

A new train schedule will be come effective on the Canadian Pacific branch between the main line and Kelowna on March 18, it has been announced.

The move has been made with an objective to giving a better freight and express service to the Okanagan.

The present train which makes a round trip daily, except Sunday, between Sicamous and Kelowna will be discontinued. It will be replaced by two mixed trains which will operate between Revelstoke and Kelowna.

The southbound train will leave Revelstoke after the departure of the last passenger trains each day except Saturday, and will leave Sicamous about 1 a.m., arriving at Kelowna early in the morning. The northbound train will leave Kelowna at 1 a.m. each morning except Monday and will arrive at Sicamous about 7 a.m. and Revelstoke at 9:30 a.m.

Each train will carry passenger coaches besides freight and express cars.

Main purpose of the new trains is to give a fast service on fruit moving from the Okanagan and on freight destined to Okanagan centres from the coast and east.

The way freight now operating between Sicamous and Kelowna will not be affected and will continue to operate as at present.

The present bus service operating between Salmon Arm and Kelowna for passengers making connections with The Canadian or the Dominion trains at Salmon Arm will be continued as at present.

Firenze is the Italian name for the city known elsewhere as Florence.

Ex-King Farouk of Egypt and his daughter, Princess Ferial, 19, arrive at the Russian Orthodox Cathedral, Cannes, France, for the wedding of Princess Marie-Louise of Bulgaria and Prince Karl Vladimirovich of Leiningen, Germany. It was Ferial's first appearance at a public function. Farouk permitted Ferial to go out dancing without a chaperone for the first time. She is the daughter of Ex-Queen Farida.

FILM SHOP

By RON BURTON
UP Staff Correspondent

HOLLYWOOD, (UP) — Actress Jill Jarmyn thinks that there comes a time in every girl's life when she should think of cheesecake as something that belongs on the dining room table.

Cheesecake — or leg art — is a great help to a girl interested in an acting career, but she is going to have to rely on ability sooner or later. At this point, Miss Jarmyn said, a girl better have more to fall back on than just what she used to have to fall back on.

"I've posed for many cheesecake pictures," she said. "However, I'm getting to the point now where I believe cheesecake should mean only food to me — not a way of getting publicity. Of course, there is nothing wrong with looking like a girl as long as you're not guilty of bad taste or being suggestive."

"I've always tried to keep cheesecake within reasonable bounds. I've cooperated with press agents when they wanted pictures of me in a bathing suit, play suit or something like that. But I think that now I'm going to be judged on the basis of a long performance — not on the basis of my figure."

Miss Jarmyn is a different-looking actress with auburn hair and large, dark eyes. She also has a splendid figure, regardless of how she may feel about future photographic displays of it.

The point in her career which makes her wonder about cheesecake is currently exemplified by her lead role in "Born Bad," a program in the Warner's "Cheyenne" TV series which will be seen nationally March 26. She worked up to the lead by numerous other dramatic parts, many of them on "The Lineup" on CBS-TV.

"I believe I will be judged in the 'Cheyenne' role on a performance basis," she said. "I wear mostly period costumes of the late 18th century, and there's nothing at all revealing about them. Sure, no one in his right mind will have trouble realizing I'm a girl, but in comparison to cheesecake, I'll look like a sleeping bag model."

The pretty actress from Chicago has a philosophical reminder that will help her say goodbye to cheesecake.

"A friend once told me that an actress who depends on her bust may wind up as just that," she said.

Street Sweeping Work Authorized

SUMMERLAND — Municipal superintendent of works, K. M. Blagborne, has been given authority by the council to sweep the streets at West Summerland as soon as they are dry.

This was one of the items on Tuesday's council agenda.

Another was the possibility of making a tennis court on the basement floor of the now demolished Ellison Hall in Peach Orchard Park. The floor is in good condition and the site is a suitable one. Tennis enthusiasts in the Summerland Athletic club are to be consulted in the matter. The present wooden courts near the badminton hall are not in good shape.

Agricultural Experts Start Insect Fight In Okanagan Fruit Areas

Agricultural scientists, including entomologists, chemists, horticulturists and fumigation experts, have pooled their knowledge in a campaign to prevent a small introduction of the Oriental fruit moth from spreading through the fruit producing Okanagan Valley.

Larvae of this serious pest of the fruit grower were accidentally brought in last fall from an area in Washington State. They arrived by truck in a few loads of peaches imported for canning purposes into the valley.

When the infested peaches were discovered at the canning plants the plant protection authorities of the department called a meeting of federal and British Columbia officials to determine what might be done to prevent spread of the insect to British Columbia orchards, in which so far the insect had not been found.

A survey was made of the canning plants that had processed any of the infested fruit, or other fruit from the same district, and of the areas surrounding these plants to which the insect might have gained access either in containers in which the fruit was handled, or in waste material from the canning operation.

Entomologists familiar with the life cycle of the Oriental fruit moth believed the lateness of the season made it unlikely that larvae imported in the fruit would reach the moth or flying stage of their life cycle before warm weather set in this spring. Until then spread of the insect would

be limited to the areas close to the canning plants.

If every insect brought in could be destroyed, infestation of the orchards would be prevented. During the fall and winter the insect is usually in the dormant or pupal stage, in cocoons, hidden under leaves or debris in the orchards, in cracks or crevices of buildings, or in containers which have held infested fruit. The problem, therefore, was to destroy the cocoons in every possible hiding place to which the larvae might have penetrated.

The areas involved included the two canning plants, roadways and yards leading to the plants, refuse dumps to which waste materials from the plant had been consigned, certain orchards adjacent to the plants and containers in which any such fruit had been packed.

FUMIGATION TREATMENT

Complete destruction of the larvae, or pupae in these areas requires several methods of attack. Buildings and the land immediately around them are being fumigated. For this purpose special plasticized coverings are placed over the buildings. The edges of the covering are buried in trenches under 12 inches of sand to prevent escape of the methyl bromide gas fumigant. Coverings must be sufficiently gas proof to retain the fumigant at specified concentrations for 48 hours. Gas concentrations are checked at various points under the cover every two hours and additional fumigant pumped in at any points showing a drop.

All the trees in an orchard near one of the canning plants will be cut down and burned. Tarpaulins, supported by the stumps will be spread over the orchard area and the ground under it fumigated with the same procedure followed in the buildings. The stumps will then be removed and burned and the ground levelled.

A city dump on which waste from one of the canning plants was deposited will be fumigated in a similar manner. Yards and roadways leading to the canning plants will be heavily oiled.

The success of the campaign to eradicate the insect will be determined during the coming spring and summer, April 15 to September 30. Bait traps to attract any moths that might emerge in warmer weather, from cocoons that escaped the treatment, will be hung from the outside eaves of the buildings, and on any trees within 50 feet that would serve hosts to the insects. Trap bands will also be placed on

a number of trees within one mile of the two plants, or about the distance of flight covered by the moths.

An intensive spray program will be undertaken in orchards adjoining the canning plants.

The estimated cost of the eradication project is approximately \$55,000. This included besides the various treatments described, compensation for the eight acres of orchard removed, special spraying of 50 acres of surrounding orchards, labor and tractor costs and compensation for unsaleable fruit.

Both the work and the cost of the project is being shared by the Canada and British Columbia departments of agriculture. Activities include fumigation of the buildings, soil fumigation, and supplementary soil treatments, orchard spraying and the trapping and banding of trees during the summer; the removal and burning of the orchard; fumigation of ripening rooms in which the fruit was stored at one plant; payment of compensation to growers for loss of trees or crop; oiling of roadways and participation in the general supervision of the project.

Before a decision was made to proceed with the project, the estimated cost of attempting eradication was assessed against the loss to fruit growers, and to consumers, that might be expected should the insect become widely established in the Okanagan Valley.

On the basis of costs for extra sprays, in other peach growing areas where the oriental fruit moth has become widespread, it was estimated that it would cost Okanagan Valley growers \$137,000 to apply two extra sprays and \$68,000 in fruit losses per year, or an annual loss that could well exceed \$200,000.

The federal department is also doing the necessary research work on the dosage of fumigant required to insure destruction of the insect in the cocoon stage. This is being done at the department's science laboratory in London, Ontario, using Oriental fruit moth cocoons from that province.

An outbreak of the Oriental fruit moth occurred in Ontario peach orchards in the early 1920's and there was a fairly widespread infestation before it was discovered. The fact and lack of the newer insecticides available today made eradication impossible.

Control depended upon early introduction of parasites attacking the fruit moth. The parasites

New Film On Arthritis To Be Shown At Annual CARS Meet

A new documentary film "Newer Surrender" will be shown for the first time in Pentiction on Monday, March 18, at the annual meeting of the local branch, Canadian Arthritis and Rheumatism Society, in the Legion hall.

The meeting will start at 7:30 p.m. This color sound film, depicting the whole treatment program of the society and made under supervision of the professional staff, is in story form.

It tells of a young girl, stricken with rheumatoid arthritis and of her fears and fight to regain her health.

Joyce Newman, a radio actress plays the girl, Andy Snider, radio and television actor, her fiancé, Bill Buckingham, actor and producer of Theatre Under The

Starrs, Vancouver, is the doctor in the story and narrator throughout the film, and his wife, Doris Buckingham, is the girl's mother.

The supporting cast is entirely made up of the professional staff of the Canadian Arthritis and Rheumatism Society, B.C. Division, its patients and some of the many volunteer workers who assist in various ways.

Apart from its entertainment value, the film is certain to stimulate considerable interest among people who previously had no idea of the extent of the work being done by CARS. It gives truthful information about arthritis and rheumatism and will encourage those who suspect they have arthritis to seek medical advice early.

Although filmed almost entirely in British Columbia, the film will be used by the CARS divisions all across Canada, to show how treatment can be arranged even in remote centres far from a modern hospital.

New Toronto-Dominion Bank Opens In City Saturday

DALRYMPLE

CONSTRUCTION LTD.

COMMERCIAL & INDUSTRIAL BUILDINGS

Congratulations

THE TORONTO-DOMINION BANK

ON

THE OPENING OF THEIR

PENTICTON BRANCH

WE WERE PLEASED TO
PREPARE THE PREMISES
FOR THE NEW BANK

Civic, Banking Officials To Attend Opening Ceremonies

Penticton's latest bank, the Toronto-Dominion, opens its doors for the first time here Saturday afternoon to conduct business in friendly, modern surroundings in this city's newest business block, the Lougheed building.

Acting-mayor H. M. Geddes will officiate at the opening ceremonies of the new bank at 2 o'clock tomorrow afternoon, which will be followed by a reception.

The general public is invited to attend the opening of the bank and to inspect the modern premises.

Situated at the corner of MacIn and Nanaimo streets, the new edifice occupies the ground floor of the Lougheed building opening there soon.

The very latest in modern technology and design has gone into construction of the bank which was designed by the Vancouver architectural firm of Thompson, Berwick and Pratt.

The wishes of the bank in regard to design and placement of facilities have been considered right from the blueprint stage, with W. D. Elliott, supervisor of new construction for the Toronto-Dominion bank, working in close cooperation with the owners and builders of the new building. This has resulted in complete satisfaction as to the efficiency and maximum utilization of the premises.

The bank area is 2,100 square feet. The two street sides are almost entirely closed with glass which gives it that ultra-smart appearance. The floor finish is rubber tile, with an acoustic ceiling featuring large, plastic-enclosed fluorescent lights.

Entering through the aluminum plate glass doors, there is a large public space with writing and cheque desks surrounded by counters.

The impressive interior, with its light, blonded wood counters and furnishings, presents an attractive, efficient scene. The large picture windows and the

light pastel color of the walls gives an airy and bright atmosphere in which to conduct business.

Since the amalgamation of the Dominion bank with the Bank of Toronto in February, 1955, the new Toronto-Dominion bank became the fourth largest chartered bank in Canada, with over

480 branches, from coast to coast.

The opening of the branch in this city is due partly to the general expansion program of the bank, and also to the belief in the expanding growth and economy of British Columbia and of Penticton itself.

Branch Manager Has Wide Banking Career

Edward H. (Bus) Cotton, 44, appointed manager of the new Penticton branch of the Toronto-Dominion Bank, brings a wide range of banking knowledge to his new position.

EDWARD COTTON

He was born in May, 1912, at London, Ontario, and entered the Toronto-Dominion Bank there in June, 1930, at the age of 18.

After service at several branches in Ontario, he moved to Vancouver in September, 1947, and served as accountant and manager at a number of British Columbia branches.

Mr. Cotton with his wife and two children had previously vacationed in the valley and formed an extremely favorable impression of this area, and the transfer to Penticton came as a welcome development.

His accountant, Paul Hansen, a recent arrival to this country from his native Denmark, had previously served in Prince George.

Banking Offers Sound Future Says Ashforth

Canada's business leaders of tomorrow are her university students of today, says Albert C. Ashforth, president of the Toronto-Dominion bank, which opens a new branch in Penticton Saturday.

Peering into the future, Mr. Ashforth sees a great future for any young man interested in a banking future.

"Top management of any organization should be thinking of its successors and should be endeavoring to build a strong following of junior executives who will be able to take over some day," he states.

Mr. Ashforth disagrees with the misinformed who wrongfully maintain the climb to the top in the banking business is a long one, with insufficient salary compensations.

"Too many people have been selling the banks short," he says. "Salaries are quite comparable with and much better than many other types of office positions."

"In addition, banks as a group, pay the highest pensions of any type of employer."

Commerce graduates are a select group in the banking world. They start at a higher salary than colleagues with less qualifications; are given a stepped-up training program; and, the prospect of a manager's post is held out when they reach their forties.

The Toronto-Dominion Bank is taking on new employees at the rate of 300 a year. Today it has 6,100 employees, 46 percent of them men, with the women (54 percent) slowly gaining more ground.

Toronto-Dominion is opening new branches at the rate of 20 a year, which means the bank is appointing a great many new managers each year.

Trailer-Tourist Camp Planned

SUMMERLAND — A new trailer and tourist camp will be established in Summerland on the Highway Hill.

John Menn has sold his orchard property to J. Sproule of Edmonton who plans to put in cabins and trailer bays.

Mr. Sproule will operate an auxiliary gas pumps and a coffee shop on the premises, but not a service station.

The site overlooks Okanagan Lake and is only a short run from Rotary Beach at Evans Point.

GOOD RECORD

SENECA FALLS, N.Y. (UP) — This upstate New York Finger Lakes village went through 1956 without a traffic fatality. The last auto fatality here was in December 1953.

The LOUGHEEDS

are pleased to

WELCOME

the new

TORONTO DOMINION BANK

to the City of Penticton and also as

one of the tenants of the

LOUGHEED BUILDING

We feel their fine new offices are a valuable addition to the business scene in this growing community and we wish them every success.

THE LOUGHEED BUILDING is now nearing completion

Tenants are moving into their new offices daily and workmen are putting the finishing touches to the building, adding distinctive louvers, painting, etc., and in a few weeks it will be officially completed.

You are invited to attend an
OPEN HOUSE
at the
NEW BRANCH OF THE TORONTO-DOMINION BANK
82 Nanaimo Street West
Saturday, March 16th, 2:00 to 5:00 P.M.

The New Branch of
THE TORONTO-DOMINION BANK
invites you and your family
to inspect our modern facilities.

You are cordially invited to visit us during our Open House and inspect the modern facilities of our new Penticton Branch. Mr. E. H. Cotton, the branch manager, and his staff are anticipating meeting as many of you as possible. They will be pleased to explain to you how our personalized services make The Toronto-Dominion Bank such a friendly, efficient place to do business.

The new Branch will be open for your inspection on Saturday afternoon. So plan to attend. Bring your family and friends. A warm welcome awaits you.

Handy Jim's EXTRA TIPS For the Home

Freshen Old Furniture

MUCH old furniture still is useful, but its appearance is

against it. Yet, it's too good to give

away and not old enough to be

considered antique. What can be done?

A bit of ingenuity and effort will

transform an old dresser into a

thing of modern beauty—and at

small cost. Note the "before and

after" sketches of the same dresser.

There's quite a change!

In general, removal of the ginger

bread from the dresser is the

first step in the renovation. A re-

cessed wood base, instead of legs,

does most to modernize the piece.

Most likely, the top has been

scarred. Basic cure is the appli-

cation of a piece of Masonite Tem-

pered Presswood, 1/2" thick. This

then may be primed and painted.

Alternates might be black Press-

wood, or Leatherwood, a textured

hardboard. One of the gay plastic-

surfaced hardboards would be suit-

able, too, as they are resistant to

stains and cigarette burns. Various

colors and patterns in Marlite are

available.

The designer has also kept the

critical housewife in mind and

has included features that will

permit this multi-purpose storage

wall to take its place in any

room, on any wall and in any

company.

Perhaps the foremost feature

of this storage wall is the four

sliding doors that by-pass each

other. They slide on nylon rollers

running in overhead tracks. The

doors themselves are sheets of

3/4" plywood, cut to size with a

handsaw.

Another feature is the "Him"

and "Her" built-in chests of

drawers, each with its own il-

luminated mirror. The "Him"

side has an outlet for an electric

razor, and the top of the drawers

is a more convenient (for shaving)

six inches higher than the other

side.

INDIRECT LIGHTING

Four porcelain light sockets

attached to the inside of the val-

ance board will provide indirect

illumination for both dresser

units and clothes closets. Square

holes, cut with a keyhole saw in

the top strip of 3/4" plywood and

covered with a clear or frosted

glass, complete the indirect light-

ing system.

Shoe storage and shelf space

are included in this plan, plus a

full length wardrobe in the cen-

tre for those long, formal gowns.

Building steps include a 2x4

floor frame and up construction

of each section. If you plan to

cover a wall 12-feet long, then

plan to build your storage unit

in two six foot sections, separated

by the 3/4" fir plywood partition

or bulkhead in the centre.

Variations in measurements can

be made easily in order to fit

the unit on a wall of different

length.

For a 12-foot unit you start by

ripping two full sheets of ply-

wood down the middle to provide

the ends and the sides for the

chests of drawers. A similar op-

eration on two other sheets of

plywood will give you the two

top and bottom pieces (floor and

ceiling) for both units, with four

24-inch squares left over for

dresser tops and drawers fronts.

The back can be sheathed in with

1/2" fir plywood, or nailed directly

to the wall.

You might plan to box in the

space between this unit and the

ceiling with plywood. For neat-

ness, add a moulding strip across

the ceiling.

Fir plywood is available in

sheets four feet wide and up to

16 feet in length, but for the

home wood-worker four-by-eight

sheets are the most practical and

economical. Dimensions for this

storage wall are based on the use

of this size with a minimum of

waste.

How To Solve Storage Problems

This is one of a series of columns by Peter Whittall on expertly-designed major projects by which the handyman can add beauty and utility to every room of the house.

House hunting, to some housewives, is really cupboard and storage space hunting.

And the lack of such space is often their main complaint about their present living quarters. No matter how big a room may be, dressers, bureaux and wardrobe storage cabinets always seem to take up too much room or "stick out" too much.

Today's project is designed to solve this problem.

A 24-inch strip taken off a 12-foot end or side wall of a bedroom will provide 144 cubic feet of practical and convenient storage space without appearing to take up too much room or "stick out" too much.

Today's project is designed to solve this problem.

A 24-inch strip taken off a 12-foot end or side wall of a bedroom will provide 144 cubic feet of practical and convenient storage space without appearing to take up too much room or "stick out" too much.

The storage wall plan outlined today can be assembled by the average home handyman in 18 basic operations, using only a handsaw, hammer, screwdriver, plane and mitre square.

Don't let the size of this unit awe or discourage you. The construction steps have been deliberately kept simple, with the beginner in mind.

The designer has also kept the critical housewife in mind and has included features that will permit this multi-purpose storage wall to take its place in any

THIS 12-FOOT STORAGE WALL, finished to match or blend your bedroom decor, combines the advantages of closets, bureaux and dressing tables in one unit.

room, on any wall and in any company.

Perhaps the foremost feature of this storage wall is the four sliding doors that by-pass each other. They slide on nylon rollers running in overhead tracks. The doors themselves are sheets of 3/4" plywood, cut to size with a handsaw.

Another feature is the "Him" and "Her" built-in chests of drawers, each with its own illuminated mirror. The "Him" side has an outlet for an electric razor, and the top of the drawers is a more convenient (for shaving) six inches higher than the other side.

NEW COURSE

BUFFALO, N.Y., (UP)—The University of Buffalo will inaugurate a four-year civil engineering course next September. The university now offers programs in electrical, mechanical and industrial engineering.

DANGER EVERYWHERE

MUSKEGON, Mich., (UP)—Paul Kamp, a former paratrooper who came through a number of jumps unscathed, was hospitalized with a hip injury after falling five feet in an industrial accident.

coniferous trees is to move them when they are small. Among the native shrubs are Amelanchier (one of the prettiest), red-barked dogwood, elderberry, and the colorful purple-flowering raspberry.

A number of perennial plants among our native flora are also suitable for garden planting, including varieties of violets, trilliums, hepaticas. Consider how attractive a small rock garden can be with columbine, harebell and golden-moss—all from a rocky cleft along the roadside.

And don't forget the many beautiful perennials that can be raised from seed—delphinium, hellebore, lupine, cornopsis and many others. Favorite biennials readily grown from seed are wallflowers, foxgloves and sweet William. Shrubs raised easily from seed include caragana and barberry.

And here's one of several ideas given by Miss Boucher for landscaping your garden for pennies. An inexpensive retaining wall for bright flowers is made by simply splicing together old railway ties. Nail each layer firmly before adding the next. Stain the dark brown and you have a pleasant contrast for your flowers.

Here's How To Keep Kitchen In Top Shape

Add to the order of home-making another possible degree—kitchen mechanic.

The average kitchen looks more like a control tower than a workshop these days, and the housewife who masters automatic gadgets certainly deserves a badge of merit.

In addition to keeping everything in tip-top running order, the modern housewife should keep her equipment as sparkling as the day it was installed.

A simple cleaning plan is necessary in the kitchen that must look like a model room every day. Here's one you may try:

1. Before you leave the kitchen after a meal, after dishes are washed and put away or stacked in the dishwasher, all surface counters, stoves and oven tops should be washed and dried, chrome and other metals wiped clean, refrigerator door washed. If post are displayed, bottoms should be polished after use.

2. Keep excess paraphernalia out of sight. Avoid exposed shelves that are likely to become cluttered with junk. These shelves usually start out with a planter and some canisters and wind up as the haven for all the junk in the house.

Everything from the hammer to the baby's bottle may be found there.

3. Mop the floor every day. It'll only take a few minutes this way but if left until the dirty stage may be a real chore.

4. Take advantage of new cleaning materials to make work easier—copper polishes that may be whisked over pot bottoms, special polishes for porcelain kitchen equipment, stainless steel, new pot cleaning gimmicks.

A new spray oven cleanser is ideal for quick use. You spray it over an area that has been used, let it set for 10 minutes or more and then wipe it clean.

5. If the wall behind your stove is always being splattered with grease, put up a back splash that may be wiped clean easily. Some of the plastic coated wallpapers are ideal for this purpose and lend a colorful note.

If you do not want that addition in color, you may find solid color papers to match your kitchen color scheme.

6. Peg board on one wall may solve a multitude of small kitchen problems. It may be the answer to where to hang the knife rack, cellophane tape dispenser, home stapling machine, pots, trays, apple molds and even the kitchen clock.

7. Avoid making cabinet cleaning a chore, by rotating the cleaning of them, straightening one out whenever it looks like it needs it. Ditto refrigerator shelves.

8. You may keep cabinets and kitchen drawers neat by using them for categories of things. Stove and oven cabinets should hold only bake, roast and cooking equipment.

One cabinet may be reserved for casserole dishes. Cabinets above the work centre may house constantly used kitchenware such as measuring cups, staples, flour,

sugar, salt, vinegar. It's a good place for tableware also.

9. Two sets of kitchen curtains will keep you alternating them so there won't be a temptation to leave them up for just another day when they need washing.

If you put your kitchen color into the curtains, try making two completely different color schemes for a new look every few days.

10. Keep brooms, carpet sweepers and mops in a special place out of sight, in their own closet, if possible. These things can mar the appearance of the prettiest kitchen if left out.

TONY VAN BRIDGE is a majestic figure in the title role of the Canadian Players' production of Shakespeare's "Othello", which plays here on Thursday evening of next week.

Amendments To Zoning Bylaw To Be Studied At Local Hearing

Further amendments to the local zoning bylaw were discussed by council at a committee session last week. All revisions will be reviewed at a formal hearing to be held shortly before being legally included in the bylaw.

A contradiction in existing rulings covering the M-1 industrial zone will be eradicated. One clause permits construction of dwellings in the area adjacent to the railway track from Lakeshore Drive to Kamloops Avenue. Another clause prohibits construction of new dwellings in this zone throughout the city in complete contradiction to the limited allowance.

It has been agreed to create a special district, consisting of the area adjacent to the railway track from Lakeshore Drive to Kamloops Avenue. Uses as may apply to the C-3 (commercial) and M-1 zones will be permitted. Other areas, previously named M-1 will be now termed M-2 and M-3, where no new dwellings will be allowed.

Rulings covering front, rear and side yards that apply to houses will, in future, also apply to auto courts. The latter must allow similar yard-areas between buildings and lot fringe lines as

are provided for residences. Also as a special ruling, no side yard for an auto court must be less than six feet for a single storey building, and eight feet for a two-storey structure.

In some zones, residence side-yards as small as four feet are permitted. An amendment passed provides that on corner lots, with frontage applicable to both streets, the set-back must be the same as for a fronting street in either direction. Revision of another section will in future rule that "every housekeeping unit in any district shall contain a gross floor area of not less than 480 square feet exclusive of garages."

It is to be further provided that "Every site located in the area served by a sewer system shall be a minimum of 6000 square feet, except in the case of smaller lots on record at the time of passing this bylaw, in which case the site may be used for the uses in this district." This ruling also states that in no case must bachelor housekeeping units comprise more than one half the total number of housekeeping units.

Apple Stocks Reported At 363,947 Boxes

Remaining apple stocks as at Saturday, March 9, totalled 363,947 boxes, reports B.C. Tree Fruits in its latest marketing bulletin.

Apart from Winesaps only 9,372 boxes of other varieties remained in stock, all of which are now sold with the exception of a few small sized Staymans and Romes.

Latest figures issued by the International Apple association show continental stocks as at March 1 to be approximately 16 million bushels, or just over four million bushels less than at the same date a year ago. Eastern holdings are about equal to those of last year with western stocks representing the major part of the overall decrease.

McIntosh from eastern Canada and Michigan are still arriving on the Manitoba and Saskatchewan markets. These are from regular cold storage and the condition of some lots is only fair.

Controlled atmosphere McIntosh have not yet been offered generally, but eastern shippers are hoping to secure \$4.50 to

\$5.00 on these holdings.

With approximately one-third of the Winesap crop shipped at this date, holdings are substantially less than last year. Generally speaking, stocks of this variety are in excellent condition.

The two unfavorable factors at this time are the one million boxes of controlled atmosphere McIntosh still to be marketed in the eastern United States and eastern Canada and the fact that the Washington market on Cee Grade Winesaps appears unsteady.

Condition is also a factor in the Washington Winesap deal, with watercore in evidence in some lots. Washington shippers regard the Cee Grade stock as one of their major problems in disposing of their Winesap crop.

So far B.C. Tree Fruits have experienced reasonably good demand for Cee Grade 150's and larger, but there has been little interest as yet in the smaller sizes, 163's - 198's.

Zoning, Health Bylaws Prepared

PEACHLAND — This community is planning to establish zoning control and health protection measures.

First readings of the necessary bylaws have been given by council.

Control of lot sizes, house areas forms one phase of the improvement bylaws.

The other bylaw will regulate restaurants, sales of milk, grocery stores, and call for inspection of meats.

A GOOD BREAK

MIDDLETOWN, Conn., (UP) — The breaking of a mirror in the home of Miss Belle R. Margolis of Longmeadow, Mass., proved lucky for Wesleyan University. Beneath the glass was a rare print of the university of the 1908 period.

New School Referendum Vote May 4

May 4 was forecast as the date for the referendum on the proposed new Green Avenue school, when trustees discussed the subject at their meeting here Wednesday night.

By an official motion the board authorized the building program and the school by-law referendum to support it. The latter would implement a debenture sale not exceeding \$425,000.

Trustees spent some time discussing the advisability of holding their referendum so as to coincide with other civic polling dates. But the date for mayor-alty voting here will come too early for the school by-law and other civic votes may be too late.

The proposed date of May 4 was decided upon by the trustees as the very latest possible, to ensure a start on building for the fall, and completion of the new structure for first classes in the fall of 1958.

In any event, the school board can save nothing by combining its voting date with other votes. By law it must retain its own polling officers and it can use school property for the voting premises.

No by-law referendum will be necessary for the new West Bench school. It can be built out of funds at the disposal of the trustees in the current budget. And at the same meeting, Wednesday night, the board adopted a motion authorizing an immediate call for tenders.

Sod Turned On New \$200,000 Soils Building

SUMMERLAND — Extending the facilities of the Dominion Experimental Farm for all phases of modern agriculture, sod was broken in an official ceremony Wednesday afternoon for the new \$200,000 soils laboratory.

Dr. J. C. Wilcox, officer-in-charge of the present soils lab, which occupies part of the same building at the fruit and vegetable processing plant, spoke on the new building. He explained that accommodation will be provided in three labs; seven offices on the second floor, and a storage room in the basement floor.

Allan J. G. McCullough of Trail, the architect, told of a similar structure just completed by his firm for the Consolidated Mining and Smelting Co. The design is functional, he said, suitable for the type of experimental work to be done.

Lyle Brock, foreman for Kenyon & Co., Penticton, who have been awarded the contract, spoke briefly.

In turning the sod, Reeve F. E. Atkinson's talk was of soils, the basis of all agriculture, and his hope that the section's progress will be facilitated with the new quarters.

Dr. T. H. Anstey, farm superintendent, introduced the speakers.

The new building is east of the present offices and will be ready for occupancy this fall, when Dr. Anstey and his staff will move into the new structure.

Two City Legal Firms Merge

Penticton will have the largest legal firm in the province, outside the lower mainland area, as the result of the merging of two long-established partnerships.

Commencing on Monday next, Messrs. Boyle, Atkins, Gilmour and Van der Hoop will be joining in partnership with Messrs. P. D. O'Brien and F. H. Herbert.

The new firm, with which seven lawyers will be associated, will be known as Boyle, Atkins, O'Brien & Company.

The practice will be carried on at the offices at 208 Main street, latterly used by O'Brien, Christian, Herbert & Lloyd.

F. C. Christian will be leaving his former firm and establishing practice in his own office in the Loughheed building.

Associated with the newly merged firm will be H. H. Boyle, J. S. Atkins, P. D. O'Brien, W. A. Gilmour, J. P. Van der Hoop, F. H. Herbert, and F. A. Lloyd.

Branch offices will be operated by this firm in West Summerland and Oliver.

Fined \$150 in Court

Jacob J. Mehler, 43, of Peachland was fined \$150 and \$450 costs in Penticton police court this morning.

He was charged, and pleaded guilty to "having care and control of a motor vehicle while his ability was impaired."

REEVE F. E. ATKINSON of Summerland turns the first sod for the new \$200,000 soils laboratory at the Dominion Experimental Farm, Summerland, as Dr. T. H. Anstey, farm superintendent, looks on. The sod-turning ceremony was held on Wednesday afternoon, with a number of district and farm officials participating.

Aquatic Development Suggested As Centennial Plan At Board Meet

D. P. O'Connell, director of the Penticton Aquatic Association, made a strong appeal for aquatic development on Skaha Lake to be forwarded to the local Centennial committee at the board of trade meeting last night.

The aquatic association is the oldest organization in Penticton, going back to the "horse and buggy days" for their first activities, on Okanagan Lake. Attempts to build up Okanagan Lake as an aquatic sports centre never quite succeeded.

The present aquatic association, active for four years, has an executive, composed of long standing Penticton residents, all convinced as to the advantages of Skaha Lake. Their opinion is based on the fact that Okanagan Lake is too shallow at the south end, and 90 percent of the time there is a north wind, both factors being bad for aquatic sports.

The North East corner of Skaha Lake now has two fine piers, with 22 feet of water at the ends. The distance between them is the Olympic Games regulation of 50 metres. All the facilities and plans were developed with the co-operation and interest of the parks board.

"Col. Swan of the British Empire Games executive, on a personal visit, commended us on the arrangements and considered Skaha Lake for the rowing course. He chose the Vedder canal, but we ran a close second," said Mr. O'Connell.

A heated pool, if included in the present plans for the Centennial pavilion, would compete in the winter time with Arena activities, he said.

"Every advantage you now see in the present selection, the Pavillion, can be done better at the Skaha Lake site," he added.

Opposition was voiced that an aquatic development at Skaha Lake would be matched eventually by one on Okanagan, and they would compete with each other.

F. W. Laird said that most swimmers now frequent Skaha Lake. There is also a tennis club and a lot of tourist attraction there. But the young people come before tourists, and this facility should be developed for them.

"We can develop a tea room and other facilities that can out do Kelowna. Kelowna hasn't anything compared with this site," he asserted.

After further discussion, a resolution was submitted by Mr. Laird and passed by the meeting: "That the matter of developing an Aquatic centre at Skaha Lake as a Centennial project be forwarded to the Centennial committee by the Board of Trade for their consideration."

Outlining the work of the Centennial committee to date, Howard Patton said that he had suggested that a budget of \$100,000 be enveloped, but that pessimists had brought him down to \$50,000. As the parks board will relinquish the \$11,000 originally allotted to them for a bathhouse for the fund, he added, the project will have to include along with summer and winter facilities for more meetings, a tea room, dance floor, and a bathhouse. The sum will not provide for immediate inclusion of a heated swimming pool in the plans.

STREET NUMBERING

A discussion on the numbering of streets, brought forth decided views from several members. From the town planning point of view, Harold Cumling said that a grid system of street layout lent itself to numbering, but it was not a practical proposition for Penticton. The cost of changing the present names for numbers would be expensive and unnecessary.

Gordon Walker pointed out that the number would greatly facilitate the sorting of mail.

G. B. Latimer believed that changing to numbers would make Penticton just another city. He proposed that the city should be divided into areas and each area given a letter. All the names of the streets in that area would begin with that area's letter.

Mrs. Leslie Balla opined, from experience of road names being changed on the benches, that "The Gaza strip is a peaceful place, compared to the benches, when they tried to change the names once before."

"That the town had run out of pioneers to supply street names was forwarded by Mr. Patton, who felt that the objections regarding the cost of change should not be considered if efficiency was increased. He suggested that in the interest of efficiency and as a gesture of those who believed in the aesthetic sense in arguing for the retention of names, that a color designation, instead of a compass

Pugh Is Named As Conservative Candidate

David Pugh, Oliver businessman, was named Progressive-Conservative standard-bearer for the Okanagan-Boundary constituency in the impending federal election at a nominating convention here last night.

J. D. Cornett, of Keremeos, a former Vancouver alderman, was the other nominee who sought nomination.

E. C. Weddell, Q.C., of Kelowna, nominated Mr. Pugh, and J. M. "Mac" Clarke of Keremeos, placed Mr. Cornett's name before the convention.

Following his nomination, Mr. Pugh pledged his full time to the campaign, and if elected, to the interests of the riding.

He appealed for the co-operation of all people who want a change of government in the forthcoming federal election.

Mr. Cornett, who asked that the vote be made unanimous for Mr. Pugh, said there will be urgent need for action in the campaign.

H. S. Harrison Smith, of Kelowna, was named as Pugh's opponent.

Skaha Lake Pump Scheme Challenged

Budget At Glance

- No changes in personal and corporation income tax.
- Old age pensions to go from \$40 to \$46 a month starting July 1.
- Family allowances to be changed Sept. 1 to \$6 monthly for children under 10 years old, \$8 for children 10 to 16.
- Tax exemption of \$100 for everyone for medical, charitable, union, and professional fees.
- Federal excise and sales taxes removed from tea, coffee, cocoa, soft drinks, candy, and wide range of other foods and luxuries.
- No change in taxes on tobacco or liquor, wine or beer.

No Major Tax Cuts Contained In Budget

OTTAWA — (BUP) — Finance Minister Walter Harris, after presenting his budget speech to the Commons last night, maintained today that the principal objective of the government was to fight inflation.

Harris told parliamentary reporters that his budget was primarily anti-inflationary. "I think the economy can absorb it without any detrimental effect," he said.

The budget raised the old age and several other types of pensions from \$40 to \$46 a month effective July 1; eliminated the 10 percent sales tax on tea and coffee, resulting in probable price cuts of six or seven cents a pound; increased family allowance payments; provided a \$100 tax exemption for medical bills, union dues, charitable donations.

The budget contained no tax relief for liquor, cigarettes, or automobiles — items which were freely predicted in pre-budget speculation as being in line for reductions.

Harris went directly from the House of Commons chambers after his budget speech to his office, where Liberal members celebrated his pre-election budget decisions to keep income tax rates at their present level, but provide additional tax exemptions. During the reception, at which coffee was served, Harris drank milk. He provided no tax reduction on liquor, wine or beer in his budget speech.

The anti-inflationary aspect of his budget speech was demonstrated in his decision to forecast a surplus at the end of the next fiscal year, March 31, 1958, of \$152 million, compared with the forecast he made of this fiscal year, \$113 million. Actually, he will end this fiscal year at the end of this month with a surplus of \$282 million.

Harris told the Commons that despite the fact the country experienced a slump in business in 1954, Canada then emerged "in a year and a half of the most spectacular period of peaceful expansion that Canada has ever experienced."

"These years have produced

Bridge On Ellis Near Completion

Today the sidewalk sections, forming the last portion of the top deck of the Ellis street bridge over Penticton creek, were poured.

The main, top-deck slab was finished by provincial crews. All that remains to be done are the side-posts, which carry the railing on the edge of the bridge.

A full 28 days, and possibly more, after final pouring of the deck, must elapse before the bridge can be opened to traffic.

This section of Ellis street was closed at the end of the fruit season last fall. The old wooden bridge was torn out and reconstruction of the new one undertaken. Work has been proceeding as weather permitted.

Linked with the new bridge, the reconstruction of the creek channel in this sector was placed under way again this week. It will ultimately be a concrete flume, similar to the portion downstream from Westminster avenue.

Provincial government crews have been working on the bridge. City crews are engaged in the work on the channel.

THE WEATHER

Temperature	Max	Min
March 13	51	24.4
March 14	47.8	24.8
Precipitation	Rain	Sun
March 13	11 mm	7
March 14	11 mm	7

Cloudy with mixed rain tonight and Friday morning. Cloudy with frequent sunny periods Friday afternoon and evening. Little change in temperature. Light southerly winds. Reaching southerly 20 in the Okanagan valley. Low tonight and high tomorrow at Penticton 35 and 45.

Oliver Third Entry In Mayoralty Race

Charles E. Oliver, former reeve of Penticton, stated today that he will be a candidate for the mayoralty by-election in Penticton on April 6.

Alderman E. A. Titchmarsh and Alderman Elsie MacCleave announced their candidacy earlier this week.

Several others have stated they may consider entering the by-election for mayor, but have arrived at no definite decision on the matter.

H. S. Kenyon who has been reportedly under considerable pressure to enter the contest, has told the Herald that he has reached no decision on it as yet.

Former-Mayor W. A. Rathbun said the number of persons asking him to allow his name to stand has steadily increased.

Alderman J. D. Southworth, stated he is still interested in the mayoralty by-election, but due to other commitments does not

CHARLES OLIVER
... third entry

City Dams Neglected Says Ex-Reeve Oliver

Frank Preddy, irrigation committee member of the Agricultural Ratepayers' association, predicted at their meeting Wednesday night, that the majority by-election campaign would be fought on the issue of the Skaha Lake pumping project.

"I believe that this is a very contentious matter with political implications," he said.

In referring to statements made earlier in the meeting, he asked council members present — H. M. Geddes, J. G. Harris, Mrs. Elsie MacCleave, and E. A. Titchmarsh — if they would be prepared to consider any other well laid counter proposals, if such were to be submitted.

"The whole issue should be clarified," Mr. Preddy said.

Acting-mayor Geddes replied that the council was not trying to force the pumping scheme. The intention was to evaluate the whole Skaha Lake water situation, to reach the best solution, and present it to the taxpayers for their decision through a by-law.

Good Contract Made Says Geddes

The increasing demands for domestic water in the Skaha lake area, and the recommendations for the best way to get it, were entrusted to a firm of engineering consultants — The Associated Engineering Services Ltd. The council was satisfied that the service, and advice obtained were entirely satisfactory, the acting-mayor said.

The survey from the engineers showed that a pumping plant at Skaha Lake would be the most efficient system. The cost of operating a gravity system is lower than from pumping, but the capital cost of a new dam is very high, he said, and also that a standby pumping system was necessary. He believed that the council had made a good contract with Associated Engineers.

The difference in cost between a gravity system and the pumps was queried by Reg Duncan.

"The exact figure is hard to give, but the estimate from the engineers is \$465,000 for the gravity system; comprising additional storage \$239,000, intake \$30,000, pipeline \$135,000, connection to reservoirs \$10,000."

For the pumps, detailed Ald. Geddes, the figures given were: intake Skaha lake \$9,750, pump-house and pumps \$58,500, proposed pipeline and valves \$143,000, for a total of \$201,250.

Ald. J. G. Harris felt that the figures did not include the cost of filtration. The cost of electricity for 90 days of pumping was estimated at \$4500.

Future requirements, which foresee an increase of three times the demand in 15 years, is a factor in some of the calculations, such as a 36 inch intake pipe and enlarged pump-house which would be designed to accommodate additional pumps.

Frontage Assessment Criticized

The long range plan envisioned by Ald. Harris was to develop as much gravity water as sane financing would permit, and to use the pumping facilities in the meantime, bearing in mind their potential for stand-by use.

The present Okanagan lake pump is connected to a grid system encircling the city and is capable of 1700 gallons per minute. The peak demand in the city at this time is 5000 gallons per minute and the forecast for 1971 is 16,000. The cost of the mains system required in the Skaha lake area is to be borne partly by taxpayers having frontage on which the pipes are laid.

J. W. Horton pointed out that the assessment of \$150 per foot on his 1700 feet of frontage would be a prohibitive amount. He had been paying taxes for many years and felt that the financing should be done in the same manner as when mains were laid in the city area in the old days.

Ald. Harris replied that the present policy was that a man who subdivides pays for all the pipes in the area he owns, and that the city pays for everything over and above the four inch line.

In regards to the Skaha lake development, the council has not as yet decided on all the details, including specific issues outlined, which will determine the wording of the bylaw.

"Anyway, if I'm to be taxed system."

No. 1 Dam In Bade Shape

Ald. Harris retorted that the No. 1 dam on Penticton creek is in bad repair and has to be rectified. In order to do so it has to be emptied, and its supply will have to be provided in the meantime from another source.

"The Boulder dam project will cost a half a million, and we haven't got that amount of money."

Mr. Oliver: "The same thing came up in 1932, argument over pumping or gravity systems. Why hasn't this dam been fixed before this?"

Ald. Harris: "This dam was condemned in 1923. It was built in 1907."

Mr. Oliver, in referring to the type of construction of what turned out to be one of the Ellis system dams, explained that

It was a "weeping dam" and was told that a new culvert was needed.

"I would say fix the culvert. The water from this dam hasn't been used for years."

Ald. Harris: "The Roy avenue pump was put in due to lack of storage on Ellis creek."

Mr. Oliver: "Since then the No. 4 dam was put in."

Ald. Harris: "Since the No. 4 dam was built, we still had to pump. We had to dump water from No. 4 in 1950 because the Roy avenue flume was out. We were then pumping, so a surplus developed. It would cost \$3000 to replace this flume with pipe. We have found out now, that the flume given us as to cost of

Penticton Herald Editorials

The Mayoralty Stakes

What promises to be the smash-hit of the spring season is certainly shaping up for Penticton's forthcoming mayoralty contest.

A great number of names indeed are being bandied about; some contentious issues are raising their heads; already some lively personalities have actually entered the lists.

That some senior representative of the current council should volunteer to step in was a foregone conclusion, to ensure continuity. There was the early anxiety, however, that so many aspirants might leave the ranks of the present council as to denude it and actually destroy the very continuity that was presumably sought.

But good sense should prevail, particularly among council members who more or less see eye to eye on general policies. They should not oppose each other unless they can show that issues of very real consequence can divide them.

If the public finds really meaningful platforms dividing aldermen who leave their present duties to seek the mayoralty, they will probably condone it. But if there is really no great difference, except in personal ambition, the public

will be very vexed indeed. We therefore, await clarification as to the extent of differences that exist between Alderman Titchmarsh and Alderman MacCleave, the two members of the present council to enter.

Alderman Southworth has actually had differences with the rest of council, as he sees it, on an issue of some prominence, but he has not yet gone so far as to convert this into a mayoralty-candidature decision.

Meanwhile, a lively turn of events brings colorful Charles E. Oliver into the running. He announced his candidature today. He is the first entry from outside council ranks, and whether there is any other such entry or not, he can be counted on to set an explosive pace. He is known to have strong differences of opinion on some issues.

The public, of course, hopes to be as informed as possible when it comes to making a decision. It is, therefore, to be taken for granted that the city will arrange, at some convenient time, a public meeting at which the various aspirants to office can sum up their views — about themselves, about each other, and more importantly about the civic issues that exist.

Letters To The Editor

Letters to the editor must carry the name and address of the sender. Pen names will be accepted for publication but preference will be given to letters published over the writer's own name.

REDRAWING CONTRACT

Editor, The Herald, Sir: Many folks seem disappointed that I failed to come right back at the writer of the letter that blasted me for spreading "definite errors in fact," "mis-statements of fact" and implications having no basis in fact.

In fact, also, is the truth that at a special meeting of council, held Wednesday morning, members spent three hours dealing with the deficiencies and bad points of the proposed contract.

That seems quite a time to spend on one who "does his community poor service". I am proud to announce to my fellow citizens, that council is now about to redraw a contract.

In the redrawing will appear the words, "Full normal supervision" instead of the suggested "casual supervision". Also, much time will be spent in protecting the legal position of your city.

The document, to which I objected, could not have been much in the interests of the city when we have spent three more hours, in addition to the many hours spent by the city solicitor. Incidentally, the city solicitor's advice to your council, suggested changes that corresponded exactly to my objections.

I thank you for the opportunity to present more vital facts to my fellow citizens.

Yours truly,

J. D. SOUTHWORTH,
Alderman.

SENIOR CITIZENS' HOME

Editor, Herald, Sir: Now that we are going to elect a new mayor for Penticton, I would like to bring before the ratepayers the need of a convalescent home for the senior citizens, who are beyond the ability to perform their own house work and care for themselves.

I have a petition of 500 names of prominent citizens to say that we need such a home.

Now that it will come to a vote for a new mayor, why not have a vote for such a home as mentioned above, so that the new mayor and the present council would have some good grounds to work on such a project.

Our late mayor, Oscar Madison, was in favor of building "small cottages for senior citizens. Why not have a Centennial senior citizens home in the memory of the old folks who have built up the country.

Yours truly,

JACK HULL.

AQUATIC

reference, be used, such as 1875, 8th Street Blue west.

The speaker for the evening, John Pallett, M.P. for Peel County, Ont., was introduced by A. Walton.

Mr. Pallett said that he was on the Banking and Commerce Committee, External Affairs Committee and Parliamentary Observer at U.N. His first visit to the United Nations was during the Suez crisis, and having been briefed that the sessions started at 10:30 in the morning he couldn't understand why the assembly room was empty as late as 11:30. He was told that the Eastern nation representatives had no idea of time, and the meeting could not start until a quorum was obtained, sometimes it was quite late in the day before proceedings opened.

He particularly noticed the tremendous repetition of ideas expounded by different speakers and formed the opinion that to most of the real work was done in committee.

The British were the recipient of much abuse in the Assembly but in the committees they were highly esteemed and accomplished a great deal behind the scenes, he said.

The Hungarian affair did more to lower the Russian position in U.N. than anything that had happened before, Mr. Pallett pointed out.

"Canada was respected as a middle class power. She wanted nothing from anyone except that they should support the United Nations and make it work. Our opinions are not selfish opinions and are respected as such," he said. Because of this, Canada introduces many resolutions for Britain and the U.S. that those two countries could not carry off in the Assembly themselves.

He praised the work of N.A.T.O. and alluded to it as the "Western Sheriff".

He ended by saying that "we should all support the United Nations and strive to turn our great material benefits to the common good of all human beings."

President G. E. Lang introduced the new secretary-manager, Frank Coates.

Serving with the English division of the Montreal Board of Trade, Coates has had long experience with the industrial and export aspects of the work. He spoke of his work with the Junior Board in Montreal, adding that the Junior Chamber of Commerce should be given every assistance.

Pioneer Orchardist Dies At 91 in Ganges

Word has been received of the death at Ganges, B.C., on February 15, of Duncan Allan Cameron, 91, pioneer Penticton orchardist.

Mr. Cameron and his family came to Penticton in 1911 and resided here for many years. The family orchard was on what is now Johnson Road, near the Upper Bench Road corner. The deceased's three children all attended school here.

The late Mr. Cameron is survived by his wife, two sons, D. Laird Cameron, Seattle; Gordon, in Vancouver; one daughter, (Phyllis) now Mrs. James Lemmon of Mission, B.C.; six grandchildren and one great-grandchild.

Last rites were held at Ganges.

BUDGET

Continued from Page One

some stresses and strains, but thanks to the energy and good sense of our people and our institutions, with an "assist," shall I say, from government policy, we have surmounted all the difficulties and strains," he said.

Budgeting for a large surplus is usually considered an anti-inflationary measure, since it drains off spending power. Cuts in indirect taxes are regarded by many economists as less inflationary than reductions in income taxes or other "direct" taxes.

Harris' budget revealed that 30 percent of total government revenues would come from personal income taxes, and 23 percent from corporation income taxes. On the expenditure side, 35 percent will go for national defense, 11 percent for interest and service of the public debt, and nine percent for family allowances. Eight percent goes to old-age pensions.

In the income tax department, Harris announced that taxpayers would be able to deduct up to 10 percent of their taxable income for payments of new retirement annuities, with a maximum of \$2,500 a year for taxpayers who are not members of a registered employer-employee pension plan, and a maximum of \$1,500 for members of a registered plan to which the employer makes a tax free contribution.

The increase in the federal-provincial pensions paid to persons between 65 and 70, and to blind and disabled persons — paid on the basis of financial need — will benefit 139,000.

The families of 1,800,000 children will benefit from the increased family allowances. About 242,000 recipients of various kinds of veterans' pensions will benefit.

Harris said that if he made no changes in Canada's tax laws and the country's booming economy continued to expand moderately, he would have revenues in the coming fiscal year of \$5,225,000,000, but with the tax changes announced, he was reducing this by about \$55,000,000. Without tax changes he could expect a surplus next year of \$207,000,000 compared with this year's \$282,000,000. Instead, with the tax cuts, he said he would expect a surplus next year of \$152,000,000.

"The severe inflationary pressures, which we have resisted so far with a high degree of success, are still with us to a considerable extent," Harris said.

"There are signs that these pressures are beginning to moderate, but it would not be wise to let down our guards of fiscal and monetary policy at this juncture.

"Too hasty action would imperil the success we have achieved so far, and an inflationary rise in prices could take away from our people far more in rising costs than they would benefit from even large reductions in tax rates.

"Much as I would like to do so," Harris said, "I cannot recommend to this house any major reductions in the general level of taxation."

To Speak Sunday At Nazarene Church

The Rev. Bert Daniels, district superintendent, will address the Church of the Nazarene here on Sunday morning.

He is in charge of the work in British Columbia and Alaska. Prior to coming to this part of the world, he was connected with the Church of the Nazarene in Miami, Florida.

PUGH NAMED

Continued from Page One

owna, president of the B.C. Progressive-Conservative Association, and a vice-president of the national body, called of the need for a strong, active organization.

He spoke of the individual qualities of the sitting member, O. L. Jones, M.P., who he said had done a good job but still remained an individual member, belonging to a group that could not bring about the national change in government so urgently needed at the present time.

Such a change can only come through the Progressive-Conservative movement, he said, for they are the only group with a truly national front that can defeat the Liberals.

Key address of the evening was given by John Pallett, M.P. for Peel County, Ont., the seat formerly occupied by the late Gordon Graydon, wartime leader of the official opposition.

"David Pugh is the kind of man I could work night and day for," said Mr. Pallett at the commencement of his address.

He added that he believed a great many people in the riding would agree with this view.

"We must restore responsible government to Canada," he pointed out.

He said the supremacy of Parliament, through the group of elected members, representing their rulings, rather than the autocratic rule of the cabinet, must be re-established.

Theoretically, he noted, the cabinet is responsible to the house. But under the Liberal regime decisions are reached and no debate upon them is permitted.

"No Liberal member can get up and speak if what he is saying is against the wishes of the leaders of that party," he declared. Unless there can be criticism from the floor of the house, it cannot be democratic.

"Yet that is what is happening in Ottawa today. It is like another rule while a Minister does not have to reply to a question, when he does so, he is traditionally supposed to speak the truth. The members of the present cabinet have ignored this rule."

As another requirement, restoration of Canada's former trade position is direly needed, said Mr. Pallett. He pointed out that formerly this country imported a great deal from the U.S., but balanced this by export-

ing other items to a wide circle of other lands. Today, through neglect and unwillingness to face facts, the Liberal regime had lost many of these minor markets.

Many of these former customers cannot meet the demands of the Liberals that they pay for all items in Canadian dollars, he added. Therefore, some other plan of interchange is absolutely necessary if this country is to fulfill its rightful place in the markets of the world.

He spoke scathingly of the credit restrictions as ineffectual where they are not downright wrong. As a result of them, there has been an increasing number of business failures, particularly in the building trade.

"The issuance of \$150,000,000 in additional credit for housing, will only allow each branch of the chartered banks in Canada to make two loans," he said. "This will be a long way from providing the needed funds to aid the potential home-owner or the building industry."

Mr. Pallett said that labor legislation, including the unemployment insurance scheme, had originated with the Conservatives, even if they had not been able to carry it out. This party had also been responsible for creation of the Canadian Broadcasting Commission, the development of the Bank of Canada and of Trans-Canada Airlines.

He said the Liberals had talked a great deal about health insurance but had never done anything concrete about it.

"The first function of a Conservative government, in power at Ottawa, would be to restore the supremacy to Parliament."

"This means that individual members would have a voice and be able to speak their minds, regardless of party rulings. "We would consider serious tax revision. Today, the municipalities are not getting their fair share. Nor are individual Canadians any better off."

Mr. Pallett referred to the wave of immigrants brought into Ontario while George Drew was premier of that province. He also pointed to an item of legislation that had stemmed the flow of raw wood pulp southward, and had provided jobs for 50,550 more Canadians.

"Our resources are not limitless. Many of our metals, and the strategic ones, may run out in ten or fifteen years. Hence there is the need for processing these metals in Canada, rather than shipping the ore southward."

On defence spending, he said the government, through one of its crown corporations had spent \$1,600 for rental of a pump for

Missionary From Bolivia To Speak Here On Sunday

The speaker at the First Baptist Church in Penticton on Sunday will be the Rev. Wm. Sturgess, B.A., B.D., who has been

on missionary work in Bolivia.

He and his wife went to the South American country in 1952, and are now back in Canada on their furlough.

During his student days, Mr. Sturgess was president of the Baptist Young People's Union of Ontario-Quebec, and also assistant minister of a church in Ontario.

He will address congregations during services at the 11 a.m., 3 p.m. and 7:30 p.m.

KEREMEOS

a few months, which could have been bought new for \$50. He said he knew of this situation, because the details of the matter had gone through his own legal firm's office.

Turning to the new leader of the Conservative movement, he referred to John Diefenbaker as "a man of destiny," who could lead Canada to new achievements.

"With the good candidate you have in Mr. Pugh, the enthusiasm you have shown, and the type of people interesting themselves in this campaign, I would unhesitatingly prophesy a Conservative victory for Okanagan Boundary in the forthcoming election," he concluded.

Farewell Party Honors Mr. And Mrs. S. A. Orr

Mr. and Mrs. S. A. Orr were the honored guests when the Peach City Promenaders' Friday night dancing group entertained last week at a farewell party at the home of Mr. and Mrs. Alfred Moss.

More than thirty square dance enthusiasts gathered for the very enjoyable party held following the weekly dance session.

Highlighting the occasion was the presentation of a gift to the honored couple followed with the serving of a delicious buffet supper from a table decorated with miniature replicas of square dancers.

Mr. Orr has made a business transfer to Vancouver where he and his family will reside.

Fred Schoening, a visitor for the past several weeks in this city with his brother and sister-in-law, Mr. and Mrs. Albert Schoening, left today to return to his home at Pincher Creek, Alberta. The family trio spent the past weekend in Vancouver visit-

ing relatives and friends. Mrs. W. E. Jackson accompanied them on their motor trip to the coast to visit her relatives there.

Mr. and Mrs. Harold Barritt were hosts to several members of Mr. Barritt's family last weekend when they entertained at a dinner party for his brother and sister-in-law, Mr. and Mrs. Wilfred Barritt of Kelowna, on the occasion of their silver wedding anniversary. Other out of town guests included their mother, Mrs. R. Barritt, and her daughter, Mrs. Merrill Ingalls, both of Vancouver. The senior Mrs. Barritt is continuing her visit here while the other guests have returned to their homes.

Miss Marjorie Betts, a nurse-in-training at St. Paul's Hospital, Vancouver, was a weekend guest at the home of her parents, Mr. and Mrs. W. I. Betts, while in this city to attend the Richards-Kerr wedding on Saturday.

Mrs. F. G. Stanmore is here from Nelson to spend a few days visiting her sister, Mrs. Iris Eustis.

Mrs. Jean Verville, Orchard avenue, was hostess on Wednesday evening to members of her bridge club.

Mr. and Mrs. William Elasoof of Kelowna were weekend visitors in Penticton with Mr. and Mrs. Graham Kincaid.

Spring Floral Setting In United Church For Richards - Kerr Rites

NEW YORK, (UP) — For the family's sweet tooth... a mix which makes a new version of apple dessert. The package contains a can of sliced apples, a bag of crust mix (but not pie crust), and a crumb topping. The desert can be served hot or cold.

White tulips, iris and other pretty spring blooms, all in softly colored pastel tones, banked the altar in the Penticton United Church for the impressive ceremony on Saturday evening uniting in marriage Eileen Elizabeth, youngest daughter of Mr. and Mrs. R. J. Kerr, of this city, and Norman Hillary Richards, youngest son of Mr. and Mrs. H. R. J. Richards of West Summerland. Rev. Ernest Rands was the officiating clergyman.

The charming fair-haired bride, who was given in marriage by her father, chose an original model gown of white moire bengaline fashioned with a very bouffant skirt flowing into a slight train. The molded bodice was designed with lily-point sleeves and a shoulder-wide, low neckline. Her veil in chapel length misted from a lace cap, she wore a pearl necklace, matching earrings, and carried a white prayer book with red roses and stephanotis to complement her ensemble.

Miss Lorraine Hill of Vancouver, as the bride's only attendant, wore a ballerina length frock of shrimp colored lace over taffeta with accessories in a lighter shade. Her small hair bandeau in leaf design matched the color in her frock. She carried a cascading bouquet of white carnations.

Wally Day of Vancouver and formerly of Summerland was best man and ushers were Keith McLean of New Westminster and William Hanlon of Penticton. Mrs. Monica Craig Fisher was wedding organist and Mrs. E. C. Hill of Kamloops was soloist.

A reception followed in the Glangurly Room at the Hotel Prince Charles with the toast to the bride being proposed by L. E. Hill of Kamloops and to the bridesmaid by the best man.

Assisting in serving during the refreshment hour were Miss Beverly Clarke, Miss Donna Pollard, Mrs. Van De West and Miss Marjorie Betts.

When the young couple left for a motor trip honeymoon to points south, the bride was attractively attired in a brown tweed suit and a brown velvet trim and honey colored accessories. She wore the red roses from her wedding flowers.

They will take up residence at Claresholm, Alberta, where the groom is stationed with the RCAF.

Among the several out of town guests at the wedding were Dr. and Mrs. J. R. Hennigar and daughter, Barbara, from Grand Forks; Gerry Bernhardt, Robert May, Miss Frances May, Allen Boyer, Miss Marjorie Betts, all of Vancouver; Miss Mary Ann

Kane, New Westminster; Mr. and Mrs. E. C. Hill, Kamloops; Mr. and Mrs. A. K. McLeod, Mr. and Mrs. E. W. Brennan, Mr. and Mrs. J. W. Madison, Mr. and Mrs. R. F. Richards, Mrs. Deming, Miss Beverley Deming, Mr. and Mrs. D. J. Taylor, Mr. and Mrs. A. F. Crawford, Mrs. A. W. Vanderburgh, Mr. and Mrs. L. Fudge, Mr. and Mrs. J. P. Sheeley, Tom Croll, Mr. and Mrs. F. E. Atkinson, Mr. and Mrs. H. G. Wright, Don Cristante, Daryle Wietzel, Mr. and Mrs. Cristante, all of Summerland.

Sugar added to fruit before freezing will retard the loss of vitamin "C" and help the fruit retain its natural color.

Liberal Women Elect Slate For Current Term

The Penticton Women's Liberal Association elected a slate of officers for the current term at a well-attended meeting Wednesday evening at the home of Mrs. C. M. Finniss.

Mrs. David McAstocker was chosen president; Mrs. S. B. Nagle, vice-president, and Mrs. Finniss, secretary-treasurer.

Those forming the directorate are Mrs. Maurice Finnerty, Mrs. C. C. Hanson, Mrs. Frank Williams, Sr., and Mrs. F. G. Lynds. Refreshments were served by the hostess with the assistance of Mrs. Williams to conclude the evening.

Concert Committee Entertains Artist

The local committee of the South Okanagan Community Concerts Association entertained at a coffee party Monday evening at the home of Mr. and Mrs. John Aikins, Duncan avenue, honoring Gary Graffman.

The brilliant American pianist was the guest artist at the third concert of the current series being held in this city in the high school auditorium.

Congratulations Extended To Dance Convener

At the monthly meeting of the Penticton Chapter, Registered Nurses' Association of B.C., held in the nurses' residence Monday evening, congratulations were extended to Miss Carol Wade, convener, on the success of the chapter's recent dance.

Business of the evening includ-

ed plans for a rummage sale in April with president, Mrs. Alfred Rothfield, and Mrs. F. Colclough as co-conveners, and the selection of Mrs. Rothfield as chapter representative to the nurses' regional meeting at Kelowna on March 22.

A film on cancer research concluded the meeting.

"ALEXANDER THE GREAT"

Advisory Council Will Disclose Penticton's Future In Recreation

Racquets Club Meet Starts Saturday

It's against SPCA rules to hit birds but there is one club that gets away with it all the time. It's the Penticton badminton club and this weekend, a giant killing will be underway as the tourney starts on Saturday morning in the Eckhardt Ave. school gym and continues through Sunday.

Racquets will be swinging continually from 9 a.m. Saturday morning when the junior class takes to the rackets until late Sunday night when the finals draw to a close.

The whole Valley will be represented in the big event, won two years ago by the Kelowna club. The Orchard city will have a tough time dominating the tournament this time because Penticton has developed into one of the best clubs in the Valley.

There will be open events, handicap events, junior events and consolation events in all senior sections where there are sufficient entries.

In the junior sections, there will be classes under 18 years of age and under 15 years.

The junior events will start Saturday morning and seniors are requested to be ready by 2 p.m. the same day.

Lions Will Hold Camp In Kelowna

VANCOUVER — (BUP) — The British Columbia Lions announced today they will operate their training camp from July 6 to 21 inclusive, at Kelowna, B.C., in preparation for the 1957 Western Football Conference season.

Prior to the session, a 10-day Canadian training camp will be held in Vancouver for Canadian tryouts from June 20 to July 1. In conjunction with the Canadian tryout camp, a three-day coaches' clinic will be held June 14, 15 and 16 in Vancouver for all interested football coaches in British Columbia.

Formal announcement of the Kelowna training session from the club's front office in Vancouver today confirmed an earlier report from Kelowna that Lions would drill there again this year. Several weeks ago the announcement they might visit the 1957 camp to a different site.

Bantam Playoffs In Final Stages

Bantam local playoffs this week saw Rangers and Red Wings emerge as the finalists in the Penticton pool. (Has this anything to do with the NHL playoffs?) Rangers topped the Bruins 6-3 last night and 8-5 Monday night. Red Wings beat Black Hawks 4-3 last night and 2-1 Monday night to take the two-game total goals semi-final.

In the Rangers' victory, Monday night, Howard McNeil scored two goals while Ken Lawson, Terry McDermott, Brian MacDonald, Doug King, Don Bester and Ian MacDonald each flashed the red light once.

Alex Galbraith, Ian and Brian MacDonald picked up a helper apiece. Bert Asay, Dave Wilson, and Eldon Pencock were Black Hawks scorers.

Howard McNeil scored a hat trick in last night's win to lead the team to their victory. Ian MacDonald scored a brace while brother Brian blinked the light once.

Brian MacDonald and Dave McDermott scored an assist apiece. For the Bruins, Dave Wilson's pair and Eldon Pencock's single accounted for the loser's three goals.

For the Red Wings' Monday night game, Russ Specht and Richard Conley each scored an unassisted goal. Corky Raynor spoiled the Red Wing goalie's bid for a shutout with a first period goal.

Specht picked up two goals in last night's Red Wing-Black Hawk game while Conley and Peter Ponto scored a single each. Specht and Ponto each picked up an assist.

Morley Morgan and Corky Raynor accounted for Black Hawks' light blinks. Morgan getting two. Bill Pickett picked up an assist on Morgan's first period goal.

DAN O'CONNELL, last night read the Aquatic association's brief on why the centennial project should be built on the shores of Skaha lake, to the Board of Trade. The brief met with a small amount of favor at the meeting.

Sum'land Teams Good Bets For Hoop Crowns

SUMMERLAND — Two return basketball matches will be played here this Saturday evening in the high school gym.

The local bantam squad will take on Revelstoke in the second game of a total point home and home series. Summerland won the first game last weekend 36-25.

The Juveniles will play Kamloops on the same night in the feature game. Juveniles hold a 46-33 margin over the Gremlins as a result of last weekend's game.

The winners of both series will travel to Vancouver to compete in the provincial finals.

Basketball fans are urged to get out and support these young players who are now striving very hard to enter the gala event in Vancouver.

Babe Ruth Meeting Tonight In Legion

The annual meeting of the Penticton Babe Ruth baseball league will be held on Friday in the main hall of the Legion at 8 p.m.

Heading the club's agenda is the election of officers for the new season and a report on the financial statement. Two members from either the league's executive or directors will be selected to represent the Babe Ruth organization on the Penticton Baseball Commission.

The annual meeting of the senior ball club will be held in the near future to elect an executive and two representatives for the PBC.

The two men from the senior club will give a total membership of 16 on the Commission. The group is already at work trying to settle a convenient date with Bob Brown and Ced Tallis of the Vancouver Mounties to visit Penticton and make an appearance at the Commission's \$10 a plate dinner to be held next month.

Parents Tops Here

Every Town Should Take Lessons From Kimberley

A nice human interest story is floating around town that every body should know about.

The subject is the midget All-Stars and their stay in Kimberley during the B.C. midget finals.

For the kids, there couldn't have been a better home-away-from-home. They got into Kimberley about 11 p.m. their time. All the cafes were closed and the boys were hungry.

But the first sign of courtesy showed when a woman cleaning a cafe offered to make sandwiches for the boys. The offer was taken and the boys ate up.

ON MONDAY following practice, Kimberley opened their youth centre or recreation hall especially for the All-Stars. Bowling, badminton, basketball and all other sorts of recreation were available. The boys took advantage of the situation to loosen up for the night game.

During the games, the crowd, which numbered over 500 each night, cheered as hard for the Penticton squad as they did for the home team. Good plays by both teams were cheered beyond anything heard in our own Memorial Arena.

WHEN BILL LOUGHEED re-

Commission Has Set April 17 As Date For Giant Council Meeting

Penticton Recreation commission has set the date for the first advisory council meeting.

The Advisory council is made up of representatives of all sports, recreation and art groups in the city and this first meeting will give the central executive an opportunity to disclose their plans for Penticton's future in the recreation field.

Many organizations have named their representative to the council but still many others have not replied to the appeal made publicly and by letter so the commission will attempt, contact with these organizations in time for the giant meeting set for April 17.

Jim Pantion, recreational director for the Okanagan, will be on hand to address the meeting and films illustrating what a recreation commission can do for a community will be shown. As well as official representatives the public will be invited to the meeting.

Application will be made by the commission to the Programs Branch in Victoria for a special grant to hire coaches for swimming and diving instruction this summer. A special summer grant is available for this purpose and the commission will endeavor to get the money to help the aquatic association, increase the number of young people interested in swimming and diving competitively.

Les Edwards, recreation director for Penticton, disclosed plans for the establishment of a history-of-sports-in-Penticton display that will be set as part of the centennial celebration in 1958. The display will contain a record of the past 50 years of Penticton sports. Pictures, stories, trophies or any other mementoes that will help tell the story, will be sought.

The commission went on record as urging all interested in Babe Ruth baseball to turn out for the general meeting tonight.

Western Conference Winnipeg Blue Bombers today announced the signing of Vernon Uecker as lineman.

Kamloops Rink Wins Canadian Legion 'Spiel

WINNIPEG (BUP) — British Columbia's Joe McKinnon won the Worts trophy, emblematic of the Canadian Legion curling championships, with a 7-1 record after a round-robin series at Winnipeg arena.

McKinnon and his crew gained the championship in the three-day series in a final draw 17-9 triumph over New Brunswick's entry from St. Stephen, skipped by Hugh Balkam.

Manitoba's Lorne Wakefield rink from Fort Garry, Alberta and Saskatchewan were huddled in a three-way tie for second place with identical 6-2 marks.

Ontario's Frank McDonald rink from Kirkland Lake, which lost to Manitoba 13-9 in the final draw, was next in the standings with five wins and three losses. New Brunswick registered an even 4-4 split; Quebec had 3-5; Nova Scotia 1-7 and Prince Edward Island's Jerry Jardine rink failed to gain a single victory.

In other final round results, Nova Scotia's Bob Perry rink from Bridgetown, lost 14-8 to Quebec's St. Annes De Bellemue rink skipped by Cely Smith; and Alberta beat Prince Edward Island 14-5. Saskatchewan had the bye.

MONTREAL (BUP) — The Montreal Canadiens celebrated Floyd Curry night by eliminating Toronto from the Stanley cup playoffs with an 8-4 win over the Maple Leafs last night, but failed to gain on first place Detroit.

DUDLEY PRITCHARD will serve as a director on the executive of the Penticton Aquatic Association this year. Before coming to Penticton, Pritchard instructed swimming and water skiing in Kelowna. He also started an aquatic club in Westbank through the Board of Trade.

SPRING MAY BE JUST AROUND THE CORNER but it is still curling season in Penticton. Winter draws are moving into their final rounds and players have their eye on the forthcoming local playoffs. It has been another big year for the Granite Club and with it grows Penticton's reputation as a hospitable curling town.

Penticton Rink Competes In Big Kelowna 'Spiel

One rink from Penticton will travel to the Kelowna annual ladies' bonspiel this weekend.

The foursome, made up of Elma Hill, Martha Halverson, Mary Jones and Mary Carberry will be the only Penticton team playing out of town this weekend. There are no men's teams competing in out-of-town 'spels.

In the Kamloops 'spiel of last weekend, Ester Carse skipped her rink of Pearl Betts, Dot Hines and Charlene Enns to victory in the 'D' and visitors' events. It was one of the best showings of a local team in out-of-town competition.

INCORRECT

Due to a misunderstanding by your correspondent, an incorrect statement was made in the curling story of last Monday's edition of the Herald. Mrs. Carse was quick to report that there was no poor arranging of the Kamloops 'spiel but that it was one of the best arranged she has ever attended.

She also said that the team had a lovely time and that everybody was very sociable.

In other curling news, Gladys Mather reported that the next ladies' draw will not be ready for publication until Monday.

The final week of draws in the regular men's curling for the CIOK trophy has been dropped for the present time. Bill Carse announced today that the Allibi

Canucks Win First Savage Cup Game

Vernon Canadians took a 1-0 lead in the Savage cup finals against Spokane Flyers Wednesday night in Spokane when they topped the Yank squad 4-2.

Period scores were 1-0, and 2-1 all in favor of the Canucks.

The second and third games will be played in Spokane tonight and tomorrow night, with the fourth in Vernon Tuesday night. Fifth and sixth games will be played in Vernon if necessary and the seventh may go to Penticton. However, the site of the seventh game has not been made official.

Potential Run-Off Still Below Normal

The outlook for water supply run-off in this area has changed slightly, according to the snow report of conditions as at March 1.

Additional snowfall has been observed during the two weeks since the report was commenced.

The report states the water supply outlook for the Okanagan and Similkameen basin has improved. But excess snow is necessary, particularly in the southern half of the basin, to be certain of a normal run-off.

Above average precipitation fell during February, with temperatures averaging four to six degrees below normal.

Snow figures for this area on the Trout Creek watershed as at March 1, show a depth of snow of 28.1 inches, containing six inches of water. A year ago there was a nine-inch water content.

At McCulloch on the eastern watershed, according to figures taken on February 27, there was 27.1 inches of snow, with 5.3 inches of water. A year ago there was also a nine-inch water level here.

This watershed is the one that indicates water supplies for the city of Penticton, while Trout Creek shows those for Summerland.

The Nickle Plate summit as at February 28, showed 32.9 inches of snow with a seven inch water content. A year ago there was an eight inch water content.

Copper mountain showed 19.9 inches of snow on March 3, with a 5.2 water content. There was a 9.1 water content a year ago.

General conditions throughout the province are similar to those of a month ago. The report states that, assuming average temperature and precipitation up to and during the run-off season normal water supplies can be expected in the Columbia, Kootenay, North Thompson and Fraser river basins.

It adds that the Okanagan-Similkameen and Skagit river regions had made a partial recovery from the larger deficits as shown in the February 1 report. The average snow rate contents in these areas show only 13 per cent below the March 1 normal.

Water run-off forecasts will be made in the April 1 issue of the snow report.

bonspiel will start on Monday. Every rink that lost during the regular draws chipped in ten cents toward a pot for this bonspiel. This money will be divided into prizes for the 'spiel to be run off in the next few weeks.

Here is the first draw of the 'spiel:

March 18, 6 p.m. — McCown vs Schramm, Cumings vs Mc Murray, A. Mather vs Lang, P. Mather vs Reekie.

8 p.m. — Swanson vs Carse, Hack vs Dirks, Odell vs McGillivray, Brittain vs Riddell.

10 p.m. — Pauls vs Hines, Koenig vs Cumberland, Dunn vs McDonald, Nicholl vs Watson.

March 19, 6 p.m. — Johnson vs Jackson, McKay vs Powers, Gulle vs Parmley, Volden vs Sheppard.

Last Rites Held For Mrs. Flora Englesby

Mrs. Flora Isabel Englesby, 81, passed away at her residence, 798 Penticton avenue, on Monday.

Born in Sunrise, Minnesota, she had resided in Penticton for the past seven years.

Surviving are three daughters, Mrs. A. G. McDonald, Silver Park, Sask.; Mrs. M. Stasnik, Resource, Sask.; Mrs. J. H. Prete, St. Brieux, Sask.; four sons, Guy and George Englesby, Penticton; Earl Englesby, Alaska Highway, and Philo Englesby of Osoyoos, and 23 grandchildren.

Funeral rites were held from the Penticton Funeral Chapel on Friday at 2 p.m., with Elder Phillips officiating.

A biennial is a plant that usually lives only two years.

Promenade!

By H.G.A.

What is taking place in square dance circles. First, let me tell you about the party held last Monday. Dancers from other groups were invited, and there were some out-of-town visitors. Over 100 dancers enjoyed the evening of fun.

This is the first party-night held by the Monday night group, and we hope that there will be many more to come.

Not to be outdone, the Friday night class is inviting the dancers from the other night classes to visit with them on Friday, March 22. Let's all go and show these fine people that we enjoy accepting their invitation. Don't forget to bring some sandwiches, cake or both. Coffee will be served for 10 cents a cup.

There will be a dance in Oliver on March 23. This will be a Boy Scout Benefit dance and there will be a door prize and raffle. Dancing starts at 8 o'clock. The Omak Boy Scouts will give an authentic Indian dance, complete with tom-tom accompaniment.

Before very long we will have an annual meeting, and at that time elections will be held for members to the executive. The meeting will be held at the K.P. hall on Monday, March 25, and all Peach City Promenaders members are invited to attend. There are some important items of business to be considered at this meeting, so be sure to be there.

The Promenaders will have a party night on Saturday, March 16, with a St. Patrick's Day theme. Bill Dickson of Omak, Wash., will be the guest caller and there will also be callers from local clubs. This should be a good dance, and will be a nice windup to a successful season of fun while dancing.

In connection with the annual meeting, it will be noted that this is an annual meeting of the Peach City Promenaders Dance Club, and only members may take part in the voting and accept office.

One of the questions which has frequently been asked is "why should I join the Promenaders dance club?" This question may be in the mind of many dancers, and a short explanation is in order.

In all recreational and other activities there must be some organization in order for this activity to be successful. Our dance club has been instrumental in sponsoring dancing activities in this area since 1951 when a former group discontinued it. The club was responsible for arranging for Ruth and Les Boyer to teach square and round dancing in 1952, and they have been with us ever since.

The club executive contacted the school board and arranged to have square dancing incorporated as part of the night class activities, and has been shepherding this arrangement ever since by assuming the task of interesting prospective dancers, registrations. And we must mention that the school board and night class directors have been most co-operative in helping us achieve our objective of helping as many people as possible enjoy this recreational activity. Many times during the past years it has cost the club hard cash to keep square dancing going. This money is made at club dances, party nights and other jamborees.

As part of the promotional scheme, we try to obtain name callers from out of town as often as possible, but it is not possible to do this too often. We also do not want to do it too often because we like to give our own callers a chance to gain experience in calling and acting as emcees. It takes years of practice and considerable expense to become a caller and we feel that it is only fair to give the local callers a chance to use their talents.

The club also organizes dances during the summer months in the parks, rumpus rooms, lawn parties. This gives enjoyment to visitors and local dancers. All this takes organization, and the Promenaders dance club is that organization.

We also organize and encourage visiting with other clubs and this 'advertisers our city, and draws dancers and other visitors to our Peach Festival. Promenaders act as official "hosts" to our many dancer-visitors, and this is, indeed, a very gratifying experience.

Penticton square dancers are respected wherever they may go. This is due to the fact that Promenaders have proven that they are good "hosts", and do not need to take a back seat when it comes to dancing. In addition, people are interested in knowing more about our city.

In order for a dancer to identify himself with the Promenaders club, he should wear a badge which shows what his name is, where he is from, and what dance club he belongs to. That is another reason for be-

Continued from Page One

running the pump were far higher than the actual cost turned out to be. It would be cheaper to run the pump than underwrite the depreciation and capital cost of replacing the pipe."

Mr. Oliver: "You agree you have a surplus on the Skaha lake system. Then use that surplus."

Ald. Harris: "But the 200 acre feet up there is not enough for winter storage."

Mr. Oliver: "You have a pump on Okanagan lake. Use it for winter supply. You are relying on strangers too much for your information. We found sites in 1932 when people were saying that there were none up there."

Ald. Geddes: "We have had the services of engineers that we feel were fully competent." J. W. Horton: "Ellis No. 3 is still a fair damsite and could be used. There is still a surplus of water in the system now."

Mr. Oliver: "A gravity system only requires one third the size of pipe. It's easier to bring water down than pump it up. I heard the cost of pumping for one year would be from 20 to 40 thousand dollars."

Ald. Geddes: "Cost will be about \$4500 for 90 days."

Mr. Oliver: "That is not in the report. You already have a surplus dam and a temporary pipe can transfer its water over to the Penticton system, when No. 1 dam is drained for repairs."

Ald. Titchmarsh: "Would Mr. Oliver tell us just what kind of an engineer he is?"

Mr. Oliver: "I am a professional engineer and have built five dams in this district in the past. Your engineers came in at the wrong time of the year to see conditions correctly."

Ald. Geddes: "They have been here since May on their surveys. The crew was already surveying the Boulder creek site when the engineer was flown in by helicopter in October."

At this point John Thord, Skaha lake grower, moved a motion of endorsement on the council's stand on pumping, but no second was forthcoming.

Referring to the scheme of diverting surplus water by means of a pipe, Ald. Titchmarsh asked: "The sixty four dollar question is how you get water from the Ellis system in freezing weather conditions?"

"In this event, use the Okanagan lake pump", replied Mr. Oliver.

Ald. Titchmarsh: "These pumps have to be shut down when there is a north wind blowing, due to the shallow nature of the water at the intake site. These pumps were put in for emergency use."

Mr. Oliver: "The trouble with freezing pipes was caused by the undercutting of the streets, from six inches to two feet, some years ago. A street improvement program at that time I said would cost the citizens a half a million dollars. I saw it, and at the time I couldn't think of any way of stopping it."

Back to Ellis creek, C. H. Hinckesman said that at certain seasons the water was not fit to use due to the heavy silt.

Rising on this point Mr. Oliver explaining that he was a chemical engineer, said the cause was due to a deposit of colloidal clay in the reservoir.

"I have asked the domestic water people what attempts have been made to prevent this, and was told there had been none. This can be prevented. These dams should not be in poor repair. It's just someone's neglect. I used to inspect the dams regularly."

Ald. Harris pointed out that the council is not obligated to supply the Skaha flats with water, but the water is becoming increasingly contaminated and the people there might end up by having to use buckets.

There is concern by the people on the higher land at Skaha lake that a gravity system would rob them of their present share of water.

Ald. Titchmarsh, in dealing with the financial side of the matter, pointed out the present unfavorable situation regarding borrowing money. He hoped that the provincial government could determine some method of backing municipal bonds.

He warned of four impending possibilities requiring large sums: extension of urban area sewers, additional schools, another storey on the hospital, extension of water services in the Skaha lake area.

"The less we borrow the better," he said, "I believe we should limit our borrowing to short term bond issues and refrain from having to resort to large long term obligations."

The alderman told the meeting that the 1956 irrigation tolls was \$36,892. Expenditures were \$18,000 for maintenance, \$5,000 for wages, and \$18,000 for capital expenditure. The proposals for the coming year are: spillway at 3 coming a member.

Members are entitled to the use of the club dance records, and responsible persons may also use the amplifying equipment. Dancers have an opportunity at this time to take part in the many activities offered by the club, and in deciding policy matters, by becoming club members.

See you all Saturday night.

SKAHA PUMPING

Continued from Page One

mile, \$3,000; Baskin line, \$1,250; restoration of link on Roy avenue, \$6,500.

He also explained the present situation regarding water licences. They were first issued in a conditional form in 1892 to the South Okanagan Land Company. Two sets were obtained to cover the Penticton Creek system and the Ellis Creek system. The land tolls whether it used water or contained in the agreements paid not. When the land company lapsed, the city took over the rights. The urban area increased at a far greater rate than the orchard land holdings, and latter areas were dropped from the tolls.

The council now is taking steps to clear up the legal aspects of the licences. The original endorsements on the licences are now doubtful and hard to enforce. The water licence transfer was never registered at Kamloops.

One of the results of the clarification would be a survey of the present land and a possibility that further irrigable land would be included in the appurtenance.

To a question by J. A. Thord, "Does the domestic system come ahead of the irrigation system?", Alderman Titchmarsh explained that legally the use was concurrent.

"There is conflict in this matter."

"The storage on Penticton creek is 1750 acre feet, the domestic demand is 150 acre feet, the balance coming from natural flow and the pump. If the city does not increase the size of the domestic intake pipe, the growers are fairly safe," he said.

The position of the storage system on Penticton creek is that No. 2 dam has been drilled to discover that it seeps and needs repair. No. 1 dam needs a new outlet pipe. This dam cannot be emptied in an emergency. If it were stripped down for repair the water rights department might require the whole rebuilding of the dam after a complete inspection of its condition at this time.

He said that in his opinion any new dams that are built will have to be of a higher standard of safety than any of the existing ones.

"Casey" Phipps and F. L. Predy were named to fill positions in the Irrigation committee.

41 Applications For Works Post Received

OSOYOOS — After sifting through 41 applications for the post of works foreman here vacated recently by Mads Jensen, the village commission has asked four applicants to appear before it for an interview tonight. Selection of the appointee will be made at this session.

OLIVER

Continued from Page One

want to make announcement at this time.

Should three members of council resign their seats, the Acting Mayor, Alderman H. M. Geddes, in consultation with the other members of council must make an immediate appointment to fill one of the vacant seats. This is in accordance with municipal act provisions. There must always be a quorum of council to carry on the city's business.

The two members of the council, who have signified their candidacy, need not resign until immediately prior to the nomination. If this happens, then a second by-election, to fill the then vacant council seats will be necessary.

In announcing his candidacy, Mr. Oliver indicated a continued and growing interest in the city's water problems.

He said that he is furthering his studies of the local water situation as well as other civic problems.

Appointed Dog Tax Collector At Osoyoos

OSOYOOS — Ray Powers has been appointed as dog tax collector. He commenced his duties immediately after his appointment by the village commission early this week.

The official flower of New York State is the rose. The official tree is the sugar maple.

HERE'S HOW . . . MAKE A CONVERTIBLE CRADLE-CRIB

A cradle that converts to a crib can be dismantled for easy storage.
 The legs are of 2 by 2-inch lumber beveled at the top and inside corners, as shown.
 Dowel holes shown in Inset A are 1 1/2 inches from the top and 12 1/2 inches from the bottom, 1/2 inches in diameter and 1/4 inches deep. Drill a 5/16-inch hole for the rockers.
 Make the rails of 1 1/4 by 2-inch lumber. Drill holes for the

Here's How To Make Your Home A "Double Value" House

The housing shortage which still continues to be a major problem in some areas in Canada, is somewhat ironically offset by those people who are suffering from what the French would call an "Ennui de Richesse" in housing accommodation.
 These are married folk who bought their homes perhaps three or four decades ago, have seen their families grow up and make homes of their own, and now look with dismay at eight or ten rooms which are for the most part unoccupied.
 One solution to their dilemma lies in sub-letting, but loss of privacy makes it an undesirable one to most people. A more practical solution, is to convert

the house, when possible, into a duplex. In this way it becomes a "double value" dwelling, providing perfectly private, compact, yet equally comfortable, quarters for the owners, as well as revenue from the converted upper portion of the house.
 Most older houses were designed in such a way that the conversion is usually architecturally not too difficult. Financially, the change over is now made much simpler by Home Improvement Loans, which are obtainable at all chartered banks at very attractive terms, and repayable over a period of time.
 Comfort and convenience usually dictate extent of other alterations. In the upper part the installation of a new kitchen is, of course, essential. As the nerve centre of the kitchen, a combination sink and tub unit is recommended, so that light laundry as well as the usual preparation of food and dish-washing may be done with the greatest ease. At the same time, modernisation of the bathroom will immediately bring the upper part into line with the most modern available, and so much more attractive to a prospective tenant.

BEAR ROAST
 NAGARA, Falls, Ont. (UP) — When smoke began to pour from the kitchen oven she had turned on only a few minutes before, Mrs. Nick Spinnell summoned firemen who pulled out a scorched teddy bear. The toy apparently had been put in the oven earlier in the day by the Spinnell's two-year-old son, Gary.
 "Housewives' walls are more in danger than ever before because labor-saving homemaking gadgets have deprived them of all the exercise they used to have," she said.
 She also suggested husbands and working women park their cars or alight from buses and subways a mile from their office — and walk the rest of the way.

If Dishes Drove Hatter Mad What About The Housewife?

So the Mad Hatter thought he had troubles! Suppose he was overwhelmed by a never-ending tea party, badgered by Alice and the March Hare, confounded by an endless chain of dirty dishes. He could at least plead insanity, couldn't he?
 But what about the average Canadian housewife? Not counting the times her generous husband takes the family out to eat, she has to wash up after 1000 or more square meals per annum.

It's a tough life. But there's hope for her. Not entirely unheeding of her plight, the designers of Canada's plumbing industry have come up with new twists in kitchen fixtures to help release her from this drudgery.
 Today, for instance, kitchen sinks are hung at a height which eliminates back bending. Gleaming drain boards flank the sink, so that dish-drying racks can be employed. Mixer-type faucets deliver water of just the right temperature and swivel nozzles take it to whatever part of the sink it is needed. Retractable hose extensions with spray nozzles make rinsing easy, and to these also can be attached spray brushes for automatic washing of dishes.

All this is a far cry from the back breaking dish washing of yesteryear. But the new fixtures are made for other purposes as well. Although much of the family wash is now done in the automatic washing machine, there is still a fair amount of linen which should be hand laundered, and for this the combination sink and tub unit is ideal. On one side, a deep tub accommodates as much water as is necessary for soaking a good day's hand wash, while the shallower sink portion is ideal for hand-rubbing and rinsing. Here is where the retractable hose attachment with its spray-nozzle comes in handy again.

Most units today, too, have built-in cupboards underneath, so that all the requisites of washing up or hand laundering are within easy reach, yet out of sight when not in use.

But perhaps the most important part of easy washing and

laundering is the constant supply of hot water which today has become so commonplace in the Canadian home. For really satisfactory washing of dishes, a preliminary soaking in water is recommended. And to make sure that water of maximum high temperature is available at all times, a check should be made to be sure that the water heater is large enough to satisfy the wants of a modern family.

Tanks of 20 gal. to 30 gal. capacities which were commonly installed in homes two or more decades ago have been found inadequate in these days of two bathroom houses, shower cabinets, automatic washers and similar appliances. But a tank of 40 gal. to 50 gal. capacity ensures a never-failing supply of this essential service.

If the March Hare and the Doormouse had combined to get the Hatter the right equipment to work with, he might never have been driven mad, or at least not seriously.

The waxed wrapper from a loaf of bread will do a good job of polishing nickel on kitchen manes, said the Alabama Extension Service. It also will work on the tea kettle.
